Backend engineer working on large-scale web apps with a background in Machine Learning

EXPERIENCE

Intuit, Mountain View, CA — Senior Software Engineer

2022 - PRESENT (PREVIOUSLY SE1 and SE2)

- Backend development of web applications in Kotlin Springboot on the Quickbooks Online product and Intuit Enterprise Suite (IES) B2B product as part of the accounting team. Designing and implementing end to end workflows using GraphQL and REST APIs and PostgreSQL persistence.
- Leading the design and implementation of an LLM-powered tool that parses user-provided data and generates Quickbooks transactions, automating the majority of user effort for the workflow.
- Set up the infrastructure for a backend Python service using FastAPI and LangChain to power Agentic and GenAI use cases for the accounting domain.
- Led the implementation of multiple accounting features for IES from 2024-2025, including coordinating across different domain teams and product owners as a domain owner. Developed the tech design and drove the implementation of a major feature with two engineers.
- Developed the async and parallel update algorithm on the accounting entries for the IES feature to be compliant with consistency and performance requirements at scale.

University of Michigan x LUMS — Research Associate

2020 - 2021

- Research project examining Facebook groups as online safe spaces for women in patriarchal societies across the Global South.
- Published in *ACM Conference on Computer Supported Cooperative Work* in 2022.

EDUCATION

Cornell University, NY — Master of Engineering in Computer Science

2021 - 2022

Merit Scholarship

Concentration in Machine Learning and AI ~ Coursework: Optimization Methods, Machine Learning Engineering, Applied Machine Learning, Deep Learning, ML Hardware and Systems

LUMS, Lahore — BSc Honors in Computer Science

2016 - 2020

Dean's Honor List

Bachelor's thesis: *ML-Guided Software Defined Networking*

SKILLS

Languages:

Kotlin, Python, C/C++, Java, Go, SQL, CUDA

Frameworks:

Springboot, GraphQL, REST, Pytorch, Sklearn, Hibernate, FastAPI, Numpy, Pandas

Infra and tools:

Kubernetes, Docker, Jenkins, AWS
